

Cross Dock Services

Our Cross Dock services address the major elements linked to your customer deliveries: flexibility, visibility, speed, dependability and cost containment.

We provide large staging areas designed to account for, stage and sort outbound shipments for dispatch within hours.

Our Southern California 3PL operations are located in close proximity to the major hubs and west coast transportation services. We are strategically positioned for quick and easy access to the local ports, rail, interstate highways and international airport.

- ❖ A **large retail fashion importer based in New York** depends on us to attend to their ocean import containers drayage, trans-loading and cross-docking to expeditiously process their own customer orders bound for multiple U.S. inland destinations.
- ❖ A ... A **high profile aerospace group** counts on us to coordinate their U.S. vendors' LTL cargoes merged-in-transit in our own warehouse & distribution center for pre-scheduled export shipments by air and ocean freight.

Features and Benefits

Combined with our comprehensive 3PL services including drayage, fulfillment, pick and pack and other customer-driven services, benefit by:

- ✓ **Reduced handling costs** by centralizing your supply chain support services
- ✓ A **dedicated Customer Service Representative** servicing your account, as a direct extension to your own logistics Team
- ✓ **Minimize touch-points and handling**
- ✓ **Streamline your communications and freight flows**
- ✓ **Leverage our comprehensive capabilities** including drayage, warehousing, distribution and national transportation services.
